Education

Indian Institute of Information Technology, Kalyani
B.Tech. in Computer Science and Engineering

2022 - 2026
CGPA: 8.91/10.0

Experience

HashedIn By Deloitte

Jan 2026 - Present

Software Engineer Intern

Bengaluru, India

- Completed a structured 5-track full-stack training program covering **Python & GenAI, Java & Spring Boot, Angular, React & Node.js and Data Engineering (PySpark & Snowflake)**, building hands-on proficiency across diverse enterprise technologies in an accelerated format.
- Led a cross-functional 5-member intern team in **Product Month**, a company-wide product development competition, collaborating with assigned Tech, Product, and DevOps coaches to architect and ship **IPS Token Exchange** - a production-grade module integrated into a live HashedIn enterprise project - **winning 1st place** among all competing teams.

AlgoUniversity

June 2025

Technical Solutions Engineer Intern

Remote, India

Technical Projects

Mini CRM - AI Powered Customer Management Platform

[Live Demo](#) | [Video](#)

- Developed full-stack CRM system with Google OAuth authentication supporting customer segmentation, campaign management, and delivery receipt tracking; tested database schema to efficiently handle 500+ customer records.
- Integrated Google Gemini API to generate AI-powered post-campaign insights analyzing delivery metrics, audience engagement, and campaign timing; processes campaign data within 3-5 seconds to deliver natural language recommendations that previously required manual spreadsheet analysis.
- Tech Stack:** React, TypeScript, Node.js, Express, PostgreSQL (Sequelize ORM), Tailwind CSS, Google OAuth
- GitHub:** [Frontend](#) | [Backend](#)

CodeMaster - Coding Platform

[GitHub](#)

- Built LeetCode-style coding platform supporting **3 programming languages** (Python, C++, Java) resource-limited Docker containers (512MB memory, 2-second CPU timeout), implemented test case validation and verdict generation system.
- Designed Celery + Redis asynchronous task queue, preventing server timeouts; load tested with 20 concurrent Postman requests all processed successfully within 3 to 7 seconds per submission.
- Tech Stack:** Django REST Framework, React, PostgreSQL, Redis, Celery, Docker, JWT Authentication

GeoPV - Rooftop Solar Potential Analyzer (Faculty-Guided Research Project)

[GitHub](#) | [Demo](#)

- Collaborated on training YOLOv12 object detection model using **400+ manually annotated satellite images**, achieving 72% precision and 69% recall for rooftop segmentation; analyzed 500+ buildings across urban test areas.
- Tech Stack:** React, Flask, Redis, YOLOv12, OpenCV, Python

Achievements

- Ranked #1** in AlgoUniversity's Graphs Programming Contest among 300+ participants.
- Ranked #2** in IIIT Kalyani Codacharya Programming Contest, outperforming 300+ college participants.
- LeetCode Top 8%:** Solved 800+ algorithmic problems across all difficulty levels; achieved contest rating of 1806 (top 8% globally).
- Secured Runner-Up** (Rank #2) in Wildlife Track at StatusCode 1 hackathon; participated in StatusCode 0 and REBASE hackathons focusing on rapid prototyping and team collaboration under time constraints.

Technical Skills

Languages: C++, Python, JavaScript/TypeScript, Java, GoLang, SQL

Frontend: Angular, React

Backend: SpringBoot, Django/DRF, Node.js/Express, FASTApi, Flask

Databases: Snowflake, PostgreSQL, MySQL, MongoDB

Coursework: Data Structures & Algorithms, Operating Systems, DBMS, OOP, Machine Learning, Software Engineering, Computer Vision
